

Country Manuals for asset managers with cross-border business activities offered by BRP Bizzozero & Partners SA

Swiss asset managers with international clients or with international business activities face increasing requirements regarding the actual knowledge of the legal framework in the country of domicile of their clients or in the country where asset management services are performed.

Country Manuals are generally deemed to be a suitable instrument to get sufficient proficiency with cross-border risks and to assess with reasonable efforts the legal risks that might be faced in the respective countries. These country manuals inform, from an asset managers point of view, about the risks and the particularities that have to be taken into consideration when performing business operations in or when dealing with citizens of a certain country as clients. With **BRP Bizzozero & Partners SA** VQF has a competent partner to offer its members country manuals at substantially reduced costs.

BRP Bizzozero & Partners SA offers numerous country manuals for asset managers as an annual subscription solution that also provides updates and alerts about important developments in the respective country.

The specific subscription conditions are listed hereinafter in the **order form**. Please send the completed and **signed** order back to VQF.

Please note that BRP Bizzozero & Partners SA aims to further expand its offerings. Contact the VQF by e-mail or telephone for the currently available country manuals.
